03 Business Area

One-Stop Total Logistics Service

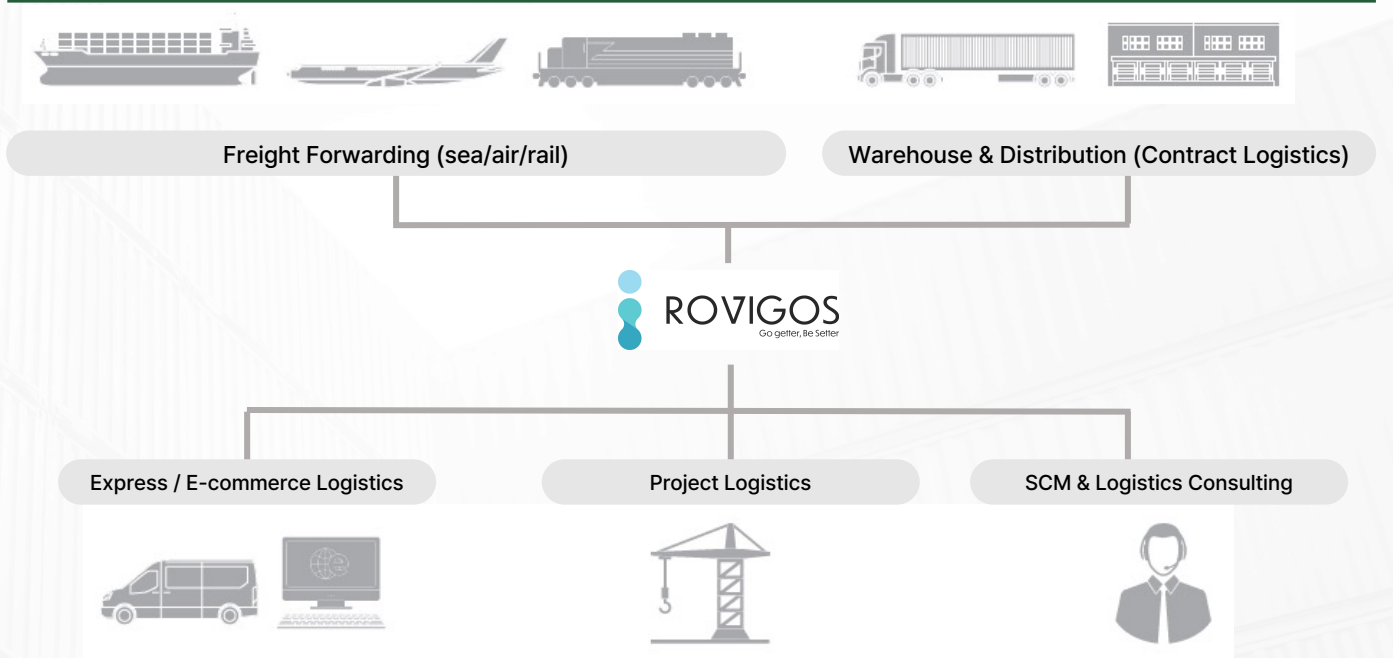

► Service Overview

With in-depth knowledge and accurate information on global maritime routes and vessels, **We help our clients dramatically reduce their logistics costs.**

► Service Strengths

We have established strong **partnerships with over 150 shipping lines across the globe.** By leveraging the specialized services of each carrier, we provide safe, prompt, and customized transportation solutions tailored to our clients' needs.

► Key Services

03 Business Area

► Air Forwarding

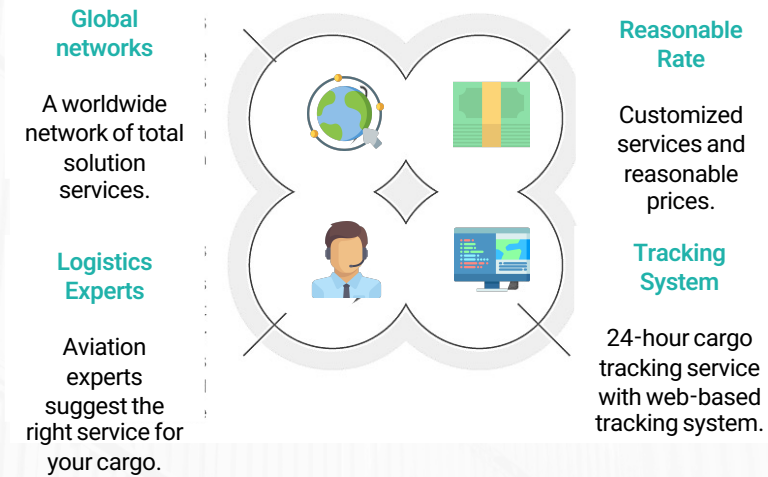

- We handle export/import cargo, bonded transport, customs clearance, SEA & AIR, and consolidation services.

With 24 global offices, 200+ forwarding partners, and contracts with 80+ airlines, we ensure smooth and reliable air shipments.

► Key Services

ROVIGOS LOGIS offers a wide range of air cargo solutions tailored to cargo type, purpose, budget, and delivery schedule—ensuring the best logistics outcome.

03 Business Area

ROVIGOS supports Global Supply Chain Operations Through Logistics Technology and data-driven platforms.

▶ International Logistics Operations

End-to-end international freight operations across sea, air, and land transport. We ensure efficient and reliable cross-border logistics execution.

▶ Logistics Data Analytics

Analyze logistics and operational data to improve supply chain visibility and decision-making. Our analytics help identify inefficiencies and optimize logistics performance.

▶ Supply Chain Management Systems

Provide integrated supply chain solutions including TMS, WMS, and OMS. Our systems enable real-time visibility, operational efficiency, and data-driven supply chain management.

03 Business Area

AI Supply Chain Solution

► Service Overview

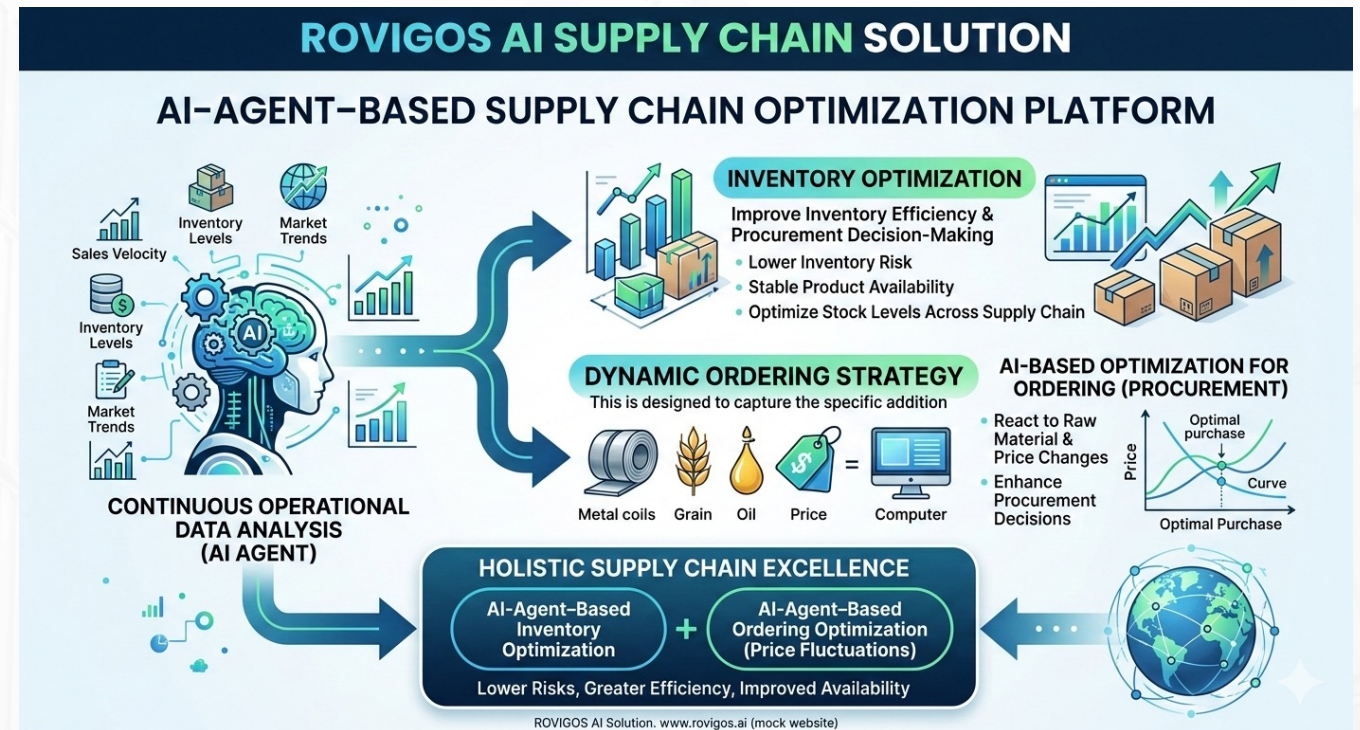

ROVIGOS AI Supply Chain Solution is an AI-agent – based supply chain optimization platform designed to help companies improve inventory efficiency and procurement decision-making.

► Service Strengths

ROVIGOS’ AI Agent continuously analyzes operational data such as sales velocity, inventory levels, and order history to optimize stock levels across the supply chain.

This enables businesses to operate with **lower inventory risk** while maintaining stable product availability.

► Key Solutions

Central Asia Supply Chain Opportunity

04 Global Supply Chain Challenge

Global Supply Chain Problems

- Increasing Raw Material Price Volatility
- Rising Logistic Costs

- Inefficient Inventory Management
- Limited Cross – Border Supply Chain Connectivity

Especially in Central Asia:

- Landlocked logistics structure
 - Complex Import – Export Logistics
- = Need for Efficient and Integrated Supply Chain Management**

04 Global Supply Chain Challenge

From Logistics Management to AI-Driven Supply Chain
AI enables companies to make faster and smarter supply chain decisions.

05 Our Vision in Central Asia

05 Rovigos AI Agent Technology

ROVIGOS Provides an AI Agents – based Supply Chain Management Platform

Key Capabilities:

- Inventory Optimization
- Procurement strategy based on raw material price trends
- Logistics data analytics
- Supply Chain Decision Support

AI Agents analyze supply chain data to support operational decision-making.

So, users can interact with the system using natural language, and AI provides insights based on real-time data.

06 Korea & Central Asia Colloaboration

Collaboration can significantly improve supply chain efficiency.

Potential areas of Co-operation

- Import and Export Logistics

- Supply chain data analytics

- Inventory and procurement optimization

06 Use Case In Korea & Malaysia

ROVIGOS Manufacturing Use Case

Warehouse in Malaysia: 90,000SQF warehouse in operation with AI Agent

[Challenges]

- Raw material price volatility
- Inefficient inventory management

[AI Solution]

- Procurement timing optimization
- Inventory level analysis

[Results]

- Reduced operational costs
- Improved efficiency

07 Expected Benefits

Collaboration with ROVIGOS can deliver the following benefits:

1

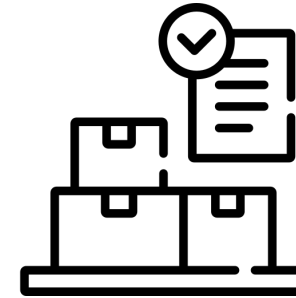

Improved supply chain efficiency

2

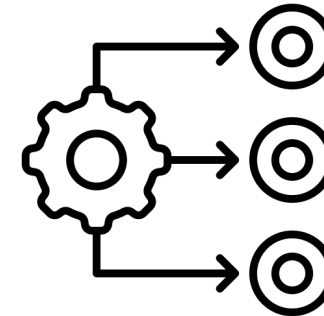

Reduced logistics costs

3

Optimized inventory management

4

Data-driven decision making

07 Partnership Vision

Driving Supply Chain DX in Central Asia

ROVIGOS looks forward to collaborating with partners in Central Asia

Central Asia is expanding raw material and manufacturing sectors present a prime opportunity for AI-driven logistics to optimize operational efficiency and global connectivity.

By integrating AI-powered management, these growing industries can bridge the gap between local production and the global supply chain.

Partnership Opportunities include:

- ▶ Government co-operation projects
- ▶ Logistics company partnerships
- ▶ Supply chain optimization for manufacturers

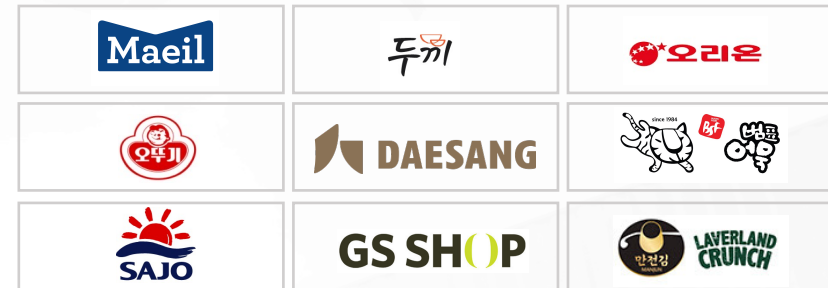

08 Our Customers

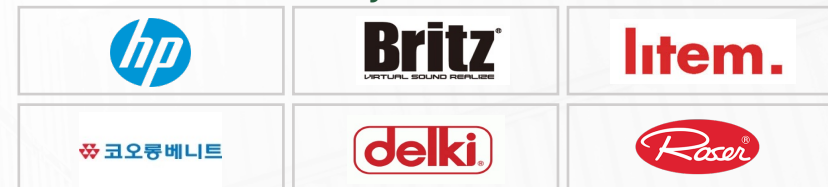

ROVIGOS LOGIS provides comprehensive logistics services in various industries:

- Food
- Electronics
- Retail
- Cosmetics & Fashion.

► F&B

► Electronics & lifestyle

► Cosmetics & Fashion

09 Global Networks

CUSTOMER ORIENTED COMPANY
